

ErdostinTM

Erdosteine INN 300 mg Capsule

Erdostin (Erdosteine) is a mucolytic drug. It is a prodrug and it becomes active after metabolism. It acts by reducing the viscosity of mucus. In addition, it has a significant antioxidant action and it inhibits bacterial adhesion to epithelial cells.

COMPOSITION

Each capsule contains Erdosteine INN 300 mg.

INDICATION

Erdostin (Erdosteine) is a mucolytic drug used in the treatment of acute and chronic respiratory diseases. It also improves the symptoms associated with short episodes of chronic bronchitis.

DOSAGE AND ADMINISTRATION

The usual dose of elderly patients and adults above 18 years is 1 capsule twice daily for 10 days. But study shows that in chronic cases **Erdostin** can be given up to 12 months or as directed by the physician.

SIDE EFFECT

Common side effect is epigastric pain. Other side effects include headache, cold, taste alterations, nausea, vomiting, diarrhea, angioedema and other skin allergic reactions.

PRECAUTION

It should be used with caution in mild liver failure. In that case, should not exceed a dose of 300 mg per day.

CONTRAINDICATION

It is contraindicated to patients who have hypersensitivity to Erdosteine. It should not be used in patients with creatinine clearance <25ml/min, or with severe liver failure.

USE IN PREGNANCY AND LACTATION

The use of Erdosteine in pregnant or breast-feeding women is not recommended.
